**DR. JOSE LUIS GOMEZ ORTIZ**  
Director Médico  
Instituto Chihuahuense de Salud  
Gobierno del Estado  
Presente.-

Por este conducto me dirijo a Usted con el fin de solicitar su autorización para la atención médica y tratamiento subrogado en el Hospital CIMA de la Ciudad de Chihuahua con el Dr. Arturo Jáuregui para continuar tratamiento y hospitalización que se inició en el Hospital Central del Estado a través del servicio médico ICHISAL, dicha solicitud es para el Lic. Julio Cesar Velázquez Salas Visitador General de esta Institución en la Ciudad de Parral y que cuenta con número de afiliación 15155/1.

Como siempre quedamos a sus apreciables órdenes para cualquier duda o aclaración.

Atentamente

**C.P. PEDRO ANTONIO QUINTANAR ROHANA**

Paciente : JULIO CESAR VELAZQUEZ SALAS  
 Origen: 6  
 Cia. Res.: ICHISAL  
 Extensión: 001

Fecha-Ing.: 09/09/2008  
 Fecha de Sal.: 23/09/2008  
 Tipo Paciente: ADULTO MEDICO I

No. del Cuarto: 444  
 Cuenta: 867598-908  
 Medico: ARTURO JAUREGUI CRUZ

Paciente : JULIO CESAR VELAZQUEZ SALAS  
 Origen: 6  
 Cla. Res.: ICHISAL  
 Extensión: 001

Fecha-Ing.: 09/09/2008  
 Fecha de Sal.: 23/09/2008  
 Tipo Paciente: ADULTO MEDICO I

No. del Cuarto: 444  
 Cuenta: 867598-908  
 Medico: ARTURO JAUREGUI CRUZ

**Dr Arturo Jáuregui Cruz.**  
**Infectología**  
**Medicina Interna.**

Chihuahua, Chih., 27 de Agosto de 2008.

**A QUIEN CORRESPONDA :**  
**PRESENTE.**

Estimados Señores :

El que suscribe, basos de su conocimiento que el Sr. **JULIO CESAR VELAZQUEZ SALAS**, de 38 años de edad, fue atendido por un Servidor durante su atención Hospitalaria en CIMA. En el presente **RESUMEN CLINICO** se hace referencia de los aspectos más sobresalientes de su padecimiento.

### RESUMEN CLINICO.

El Sr Velazquez Salas acudió a mi consulta privada el día 08 de Septiembre de 2008 con cuadro de Fiebre elevada, calosfríos, diaforesis profusa, tos, disnea y ataque a su estado general.

De antecedentes relevantes, originario y residente de Cd Parral, Chihuahua, casado, abogado, desempeñándose como funcionario en Derechos Humanos. Se mencionó historia de Diabetes Mellitus de 1 años de evolución con tratamiento a base de hipoglucemiantes orales.

Su Padecimiento lo inició 2-3 meses previos con ataque a su estado general, cansancio y fatiga. El día 09 de agosto de 2008 presentó edema-eritema y dolor de pie-pierna izquierda. Hospitalizado en Cd Parral bajo diagnóstico de trombosis venosa. Por mejoría se egresó y posteriormente referido a valoración por Angiología. Comenta persistió con disnea, fatiga, fiebre y pérdida de peso y así, el 09 de Septiembre de 2008 deciden acudir a mi Consulta Privada. Se recibió en muy malas condiciones generales, febril y con estado séptico. Se decidió hospitalizar con diagnósticos de **SINDROME FEBRIL, SINDROME CONSUNTIVO Y SINDROME ANEMICO, EN ESTUDIO.**

Sus primeras horas son torpidas presentando Insuficiencia Respiratoria Aguda secundaria a insuficiencia Cardíaca. De relevante fue su laboratorio que mostró anemia y leucocitosis importante. Por la sospecha de Endocarditis Bacteriana Aguda se realizó ecocardiograma transtorácico y trans-esofágico, confirmandose en ambos la presencia de lesiones vegetantes sobre válvula aortica y mitral. Por la severidad de su padecimiento se plantea y realiza cirugía cardiaca para revisión y en su caso remplazo valvular. El día 12 de Septiembre ( 3 días después de su ingreso ) fue intervenido quirúrgicamente, confirmando diagnóstico de Endocarditis Bacteriana Aortica y Mitral con probable Cardiopatía Reumática Inactiva. Se realizó ; Remplazo valvular aortico Biológico, tipo Sant Jude 23 y reparación de valva mitral, ambas con éxito. El reporte histopatológico ( Dr Ernesto Ramos Martínez ) fue de endocarditis bacteriana válvula aortica con presencia de flora microbiana y Hongos ( *Candida sp* ). Un cultivo de expectoración reporto *Candida albicans*. En su evolución post-operatoria presentó nuevo cuadro de insuficiencia cardiaca con derrame pleural bilateral, además de sospecha de infiltrado sépticos de tipo mixto ( bacterianos y por *Candida albicans* ). Se brindaron antimicrobianos de amplio espectro junto con antimicóticos, del tipo de Voriconazol = *Vfend* y posteriormente Amfotericina Liposomal = *Ambisome*.

Su evolución clínica fue satisfactoria y se egreso sin secuelas o complicaciones el 24 de Septiembre de 2008.

ATENTAMENTE

  
**Dr Arturo Jáuregui Cruz.**  
**Infectología**  
**Medicina Interna.**
